

# Container glass collection for recycling in Europe

In 2020, in the EU27 + UK,  
on average **80%** of glass bottles  
and jars were **collected**  
**for recycling**

- 1 Eurostat 2019 data was used for Denmark, Estonia, Finland, Hungary, Latvia, Lithuania, Luxembourg, Malta, Norway, Poland, Slovakia and Slovenia, which may reflect a "recycling rate" and not a "collection for recycling rate" for that year.
- 2 In Austria, Eurostat 2019 data was used for "packaging placed on the market".
- 3 In the case of Ireland and the United Kingdom, the estimates reflect a "recycling rate" and not a "collection for recycling rate".
- 4 In the case of Turkey, the data does not reflect the whole market and is not comparable to previous years.

Source – 2020 data
