

Reiling at a glance

Benedikt Heitmann

Introduction of the speaker

Benedikt Heitmann

- Studied environmental process engineering and recycling at TU-Clausthal
- Master thesis written on the subject of "Fine grain production during container glass processing"
- Employed at Reiling Glas Recycling for 8 years in R&D and product development
- For over two years in the management of Ruhrglas Recycling GmbH & Co. KG
- My main task is to find and lift technical innovations and optimizations. Today's progress is tomorrow's standard

Facts about the Reiling Group of Companies

- As a family-run recycling company now in its fourth generation, Reiling is committed to the collection and recycling of a wide range of materials
- We are a partner to industry, local authorities and collection systems
- In addition, various services such as logistics and consulting are offered
- We also produce and sell foam glass
- 650 employees in Europe

- The goal: A closed recycling cycle. Conserve resources. Protect the environment

Facts about the Reiling Group of Companies

- 19 German and international sites
- Glass processing takes place at 12 locations
- We collect and process over 1 million metric tons of glass per year
- We are dynamically expanding our recycling capacities and relying on new technology so that we can fulfil the quality and quantity requirements in the future

THANK YOU

RECYCLABLES MANAGEMENT. RECYCLING. WITH US YOU CLOSE THE LOOP.
