

## 2022 CULLET INTEGRATION DATA IN VERALLIA

Verallia achieved **55.7%** of external cullet in its global production, or

- around 1 point more compared to 2021.
- **+ 6.7 points compared to 2019** (reference year, 49%).

Verallia entities in **Western Europe** achieved **62.4%** of external cullet in their manufacturing, as a result of ramped-up efforts to source cullet.

Verallia have integrated **393,000 Tons** of additional cullet compared to 2019, which is equivalent to **94,760 Tons of CO2 not emitted**.

# “VERTICAL INTEGRATION” IS ONE KEY DRIVER, but not only.

To combine approach to our “own” treatment centers with the “external” ones, meaning a common platform to get:

- Improvement of installed equipment, taking advantage of the **best-in-class technologies**
- Care on process control to get the highest **quality standards of the final product** at the same time **minimize costs & losses.**
- Adopting for all supplies the **same quality criteria.**
